

LANDFILL SOLID WASTE DISPOSAL SERVICES

Safe, Compliant Non-Hazardous Solid Waste Disposal

Landfill Disposal Services

Tradebe offers safe, compliant non-hazardous solid waste disposal providing waste generators with a cost-effective and reliable option regardless of the quantity generated.

Tradebe partners with various landfills throughout the US and also owns and operates the Tradebe Brooklawn Disposal facility in Baton Rouge, LA serving the Gulf Coast region.

The Brooklawn Disposal facility is a Type-I Industrial Solid Waste Landfill with 26 acres of 2.6M cy total permitted capacity with room to expand.

Employing the latest advances in landfill technology, Brooklawn was built with the highest landfill construction standards that include secure environmental protection system engineering, groundwater monitoring, leachate controls and more.

Bulk shipments of both solids and liquids are accepted into the Brooklawn Disposal facility once approved through our Waste Stream Profile compliance team who will verify and determine the best handling of the waste.

Wastes accepted include asbestos, (must be double-bagged and wetted), contaminated soil, sand and gravel, blasting media, filter cake sludge, wastewater treatment sludges, contaminated debris and more.

To find out more about how Tradebe can assist you in achieving your sustainable waste management objectives, visit us on-line at www.tradebeusa.com or call us at (800) 388-7242.

with room to expand.

WHY TRADEBE?

Acceptance Flexibility - Liquids, Sludges

Tradebe offers solutions for disposal of non-hazardous liquids and sludges that include solidification and stabilization.

Our knowledgeable and trained regional facility personnel bulk smaller quantities of non-hazardous materials, packaging them for safe and efficient shipment for landfill final disposal - saving our clients both time and money.

Sustainable Business Practices - Reliable, Safe and Compliant

Tradebe, the leader in sustainable waste management, believes that as environmental stewards we must insist on safe and cost-effective solutions for wastes that are disposed of - in the best interest of the environment and our communities.

Our commitment to the environment and to our clients we serve means Tradebe's Landfill Disposal services are supported by our extensive operational, technical and environmental compliance resources.

For over 40 years, Tradebe's clients have trusted us to deliver safe, best-in-class service combined with an assurance that the protection of the environment and our communities is our priority.

Turnkey Cost-Efficient Solution - Network of Facilities and Equipment

Tradebe's extensive network of TSDF facilities, service centers and transportation fleet delivers the convenience and cost-savings of volume bulk shipments.

As usual with all waste managed by Tradebe, all proper documentation and tracking required is maintained for full waste generator and facility compliance.
